2.0114 Refusal to Work

Any person refusing to perform manual labor in accordance with the sentence of the court shall be deemed in contempt of court and shall be punished accordingly. In granting any variance, the Zoning Commission shall prescribe any conditions that it deems to be necessary or desirable. However, no variance in the strict application of any provision of this chapter shall be granted by the Zoning Commission unless it finds:

1) That there are special circumstances or conditions, fully described in the findings, applying to the land or building for which the variance is sought, which circumstances or conditions are peculiar to such land or buildings and do not apply generally to land or buildings in the neighborhood, and that said circumstances or conditions are such that the strict application of the provisions of this chapter would deprive the applicant of the reasonable use of such land or building.

2) That, for reasons fully set forth in the findings, the granting of the variance is necessary for the reasonable use of the land or building and that the variance as granted by the board is the minimum variance that will accomplish this purpose.

3) That the granting of this variance will be in harmony with the general purpose and intent of this chapter and will not be injurious to the neighborhood or otherwise detrimental to the public welfare. In addition to considering the character and use of adjoining buildings and those in the vicinity, the commission, in determining its finding, shall take into account the number of persons residing or working in such buildings or upon such land and traffic conditions in the vicinity.

4) When the special conditions or circumstances as noted above in 6.1001-1.-a.1), a.2) and a.3) exist and a request for a variance to construct a patio or entrance deck in the front yard, including the rationale which supports the request, is presented to the Zoning Commission a variance to the front yard setback requirement may be considered based on the merits of the individual case. A variance allowing the front yard construction shall not include any wall, roof, overhang, enclosure or any other construction that conflicts with the intent of the front yard setback requirement. The elevation of the construction (excluding railings) shall not be greater than the elevation of the first floor above grade of the existing structure. The setback requirement when the above conditions and requirements are met may be reduced, but not to less than twelve feet (12').

5) Notice and Hearing. No action of the Council shall be taken on any case until after due notice has been given to the parties and public hearing has been held, concerning commercial building permits.

by the said Commission upon its own motion, or upon receipt of a request therefore from the City zoning commission or upon receipt of a petition therefore from any interested person or persons or their agents.

1. Report by City Zoning Commission - Public Hearing. The governing body shall require a report from the City zoning commission on a proposed amendment before taking final action thereon. The City zoning commission shall thereupon make a tentative report and hold a public hearing thereon with notice the same required for a public hearing by the governing body, before submitting its final report. Such final report shall be submitted within ninety (90) days after the time of referral of the proposed amendments to the City zoning commission unless the governing body is agreeable to an extension of time.

2. Action by Governing Body - Public Hearing. After the receipt of the required final report on any amendment from the City zoning commission or in the event of the failure of the City zoning commission to so report within ninety (90) days following the time of referral of the proposed amendment to the City zoning commission, the governing body shall hold a public hearing, after which the proposed amendment may be passed. Not less than fifteen (15) days notice of the time and place of holding such public hearing shall first be published in the official newspaper. A hearing shall be granted to any person interested, and the time and place specified.

3. Vote after Protest. If a protest against a change, supplement, modification, amendment or repeal is filed and signed by owners of twenty percent (20%) or more:

- a. Of the area of the lots included in such proposed change; or
- b. Of those immediately adjacent in the rear thereof extending 150 feet therefrom; or
- c. Of those directly opposite thereto extending 150 feet from the street frontage of such opposite lots.

The amendment shall not become effective except by the favorable vote of three-fourth (3/4) of all the members of the governing body.

The erection, construction, reconstruction, alteration, repair, conversion or maintenance of any building or structure or the use of any building, structure or land in violation of this article or of any regulation, order, requirement, decision or determination made under authority conferred by this article, shall constitute the maintenance of a public nuisance and any appropriate action or proceeding may be instituted by the City, through any administrative officials, department, board of bureau charged with the enforcement of this article:

WATER AND SEWER

ARTICLE 1 - Utility Established

7.0101 Water and Sewer Department Established

There is hereby established and created within the City a department to be known as the City Water and Sewer Department. The department shall have general charge of all plants, systems, works, instrumentalities, equipment, materials, supplies, sewage disposal plants, lagoons, intercepting sewer, trunk connections, sewer and water mains, filtration works, pumping stations and all parts and appurtenances of the foregoing which are used or useful in connection with the collection, treatment and disposal of sewage, waste and storm sewers for the inhabitants of this City, subject to all ordinances, rules and regulations.

7.0102 City Water and Sewer Department to be Independent Agency

All of the business affairs of the City Water and Sewer Department shall be conducted, insofar as is possible within the ordinances of the City, as a completely separate and distinct division of the City. Separate and distinct accounts shall be set up on the books of the city auditor. These accounts shall at all times reflect the true condition of the Water and Sewer Department, as distinct from the remaining business of the City and shall be so devised as to disclose the annual profit or loss of the department. The funds of the department shall be held in the custody of the city auditor and disbursed upon warrant in the same manner as other funds, but the Water and Sewer Department shall be given credit upon the books of the City for any and all funds paid by it into the City treasury and shall be charged on the books of the City with all payments made by the City on its behalf. Transfers from the Water and Sewer Department to the General Fund or any other fund of the City shall not be made except upon order of the governing body nor shall transfer be made from City funds to the Water and Sewer Department without like order. (Source: North Dakota Century Code section 40-33-12)

Where bonds have now been, or may hereafter be issued against any water works improvement or sewage improvement, which constitute a general obligation of the City, the taxes levied for the payment of such bonds and interest shall be levied and expended for such purpose in the manner provided by law, until such time as it may be possible out of the proceeds of the Water and Sewer Department, after setting up a reasonable reserve for depreciation and new construction, to make payment of the bond requirements from the profits of the Water and Sewer Department. It is expressly declared to be the purpose of this ordinance that as soon as the same can be accomplished without undue burden to the water users of this City, the Water and Sewer Department shall be placed upon an entirely independent basis as a separate business enterprise.

7.0103 Scope of Utility

The properties of the City Water and Sewer Department and all future improvements, extensions and enlargements thereof, together with all cash and other assets held in the City's Water and Sewer Utility Fund and all moneys to be derived thereafter from the services, facilities, products and by-products of said utility, shall be and are hereby appropriated and dedicated to the purpose of insuring the public health, safety and welfare by furnishing and making available water and sewerage service to the City and its inhabitants and industries. Said utility shall at all times be under the management and control of the governing body of the City and shall by it be operated and maintained in such manner as to provide its service with maximum efficiency and at the minimum cost which is compatible with the plan of operation herein described.

7.0104 Service Charges - Use of

The City Water and Sewer Department shall at all times be so operated and maintained, and rates and charges for its services, facilities, products and by-products shall be such, as to make the utility self-supporting and self-perpetuating. Such charges from time to time imposed and collected shall be made and kept adequate to pay as incurred all costs of operation and maintenance of said utility and to establish

and maintain reasonable operating reserves; to produce net revenues which shall be sufficient at all times to pay promptly the principal and interest due on all obligations of the City incurred for the improvement, extension and enlargement of said utility, to the extent that such obligations are according to their terms payable from said net revenues, and to establish and maintain adequate reserves for the security of said obligations. Charges may be set to produce surplus net revenues, over and above current principal, interest and reserve requirements, in amounts sufficient to provide reasonable allowances for depreciation and replacement of the utility plus a reasonable return on the City's capital investment therein which surplus net revenues, when actually on hand, and to the extent that they are not required as a reserve for depreciation and replacement, may from time to time be appropriated by the governing board to pay or contribute to the cost of any other City functions, subject to the limitations now or hereafter prescribed by law.

The foregoing appropriations shall not, however, be deemed or construed to preclude the City from defraying any part or all of the expense of any improvement, enlargement or extension of the water and sewer utility by the levy of special assessments or taxes or the issuance of general obligation bonds, whenever and to the extent that such action is authorized in the manner provided by law and is deemed fair and equitable by the governing body.

7.0105 Policy on Improvements - Extensions

It is hereby declared to be the policy of the City, subject to such modifications as shall be deemed by the governing body to be required by special circumstances in individual cases, and subject to such modifications as may hereafter be made by ordinance amendatory hereof or supplemental hereto, that the cost of capital improvements, enlargements and extensions of said utility shall be paid in the following manner:

1. Where water mains not exceeding six inches or sanitary sewer mains not exceeding eight inches in diameter are installed adjacent to residential properties, and where water mains not exceeding eight inches or sewer mains not exceeding ten inches in diameter are installed adjacent to commercial properties, the total cost thereof shall be assessed against the properties abutting on such improvements, in sums proportionate to and not exceeding the total benefits determined to be derived therefrom by the respective properties. Water and sewer mains of the dimensions above described are referred to herein as "lateral" mains and other mains are referred to as "trunk" mains.
2. Where a trunk main is installed, the governing body upon advice of the city engineer shall estimate the probable cost of construction of a lateral main at the same time and place and such estimated cost shall be assessed against the properties abutting on such main and in the manner above provided.
3. Twenty percent (20%) of the cost of any sanitary sewer in excess of the estimated cost of a lateral sewer at the same time and place shall be assessed against all properties determined by the governing body to require the immediate construction of such main as a trunk sewer, including properties abutting thereon and properties served or capable of being served by lateral sewers connected thereto, in amounts proportionate to and not exceeding the benefits determined to be derived by said respective properties from such trunk sewer.
4. The total cost of storm sewers shall be assessed against properties within the area determined to be benefited thereby, in amounts proportionate to and not exceeding the benefits determined to be derived therefrom by the respective properties.
5. Where a portion of the benefits of any of the foregoing improvements is deemed to accrue primarily to the City at large, a portion not exceeding twenty percent (20%) of the cost thereof, as determined by the governing body, may be paid by the levy of ad valorem taxes upon all property within the City over the same period as the levies of assessments for such improvements, or any portion or all of such cost may be paid out of current funds duly provided in the budget, or from the proceeds of general obligation bonds duly authorized by the electors.

6. Such portion of the cost of any improvement, extension or addition to the utility as is not paid by special assessments and taxes levied and actually collected in respect thereof shall be paid from the net revenues of the utility.

7. Where due to any error or omissions or to any special circumstances a special assessment is not levied against any property benefited by an improvement at the time of the construction thereof in accordance with the program described in this section, the City reserves the right to levy a supplemental special assessment upon such property or to impose and collect a special charge for the connection of such property with the utility system in such amount as shall be required to pay its just share of the assessable cost of such improvement.

7.0106 Utility Fund - Separate Accounts

All moneys received by the City in respect of the services, facilities, products and by-products furnished and made available by the City Water and Sewer Department, except collections of special assessments and taxes appropriated to improvement district funds and moneys borrowed for capital improvements, and all money, receipt and returns received from any investments of such earnings, shall be paid into the treasure of the City and kept in a special fund which shall be permanently maintained on the books of the City, separate and distinct from other funds, and designated as the Water and Sewer Utility Fund. In the records of this fund, all receipts and disbursements of money on account of or in connection with the utility shall be entered and reflected; but the moneys from time to time on hand therein shall always constitute public municipal funds and shall be deposited and their safekeeping secured like other City funds. Separate accounts within the Water and Sewer Utility Fund shall be permanently maintained for the purpose of segregating the revenues required to meet the several expenses and obligations of the utility, as provided below, and such revenues shall be administered and accounted for as follows:

1. Operation and Maintenance Account. There shall be credited at least once in each calendar month to the Operation and Maintenance Account of said fund, as a first lien and charge on the gross revenues of the utility such sum as shall be needed, over and above any credit balance then held therein, to pay all claims due which by accepted accounting practices constitute normal, reasonable and current expenses of operation and maintenance of the utility, and to pay such expenses estimated to accrue for a period of approximately one month, and to maintain a reasonable reserve for contingencies. Moneys in said account shall be used only to pay expenses of the foregoing type, and not for repairs or replacements or for capital improvements properly chargeable to replacement and depreciation reserves or surplus funds.

2. Principal and Interest Account. The Principal and Interest Account of the Fund, shall continue to be maintained until the payment in full of the improvement warrants issued against said fund.

3. Revenue Bond Account. The net revenues of the utility are herein defined as the aggregate of all sums on hand in the Water and Sewer Utility Fund from time to time in excess of the current requirements defined in (1) and (2) above. The entirety of the said net revenues shall be credited each month to the Revenue Bond Account of the Water and Sewer Fund until there shall have been credited within said account, and thereafter so much of the net revenues as shall be necessary to maintain at all times, a reserve in an amount at least equal to the sum of the principal and interest payments due within each next succeeding twelve-month period upon all revenue bonds of the City heretofore or hereafter issued and made payable from said accounts. After this reserve has been created, there shall continue to be credited out of the net revenues to the Revenue Bond Account each month, over and above sums required to maintain such reserve, an amount not less than one-twelfth (1/12) of the sum of the principal and interest to become due on all such revenue bonds within the then next succeeding twelve months. Moneys in said account shall be used only for the payment of principal and interest as it becomes due on said revenue bonds, and the reserve shall be used for such purpose only when other moneys in the account are insufficient. All revenue bonds heretofore and hereafter issued and made

payable from said account, subject to the limitations upon such issuance contained in Section (6) hereof, shall constitute a first lien and charge on the net revenues of said utility without preference or priority of one bond over any other. However, if at any time the moneys in the Revenue Bond Account should be insufficient to make all payments of principal and interest due on such revenue bonds, and cannot be made sufficient by transfer of moneys from the other accounts described below, the moneys available shall be first used to pay interest then accrued on all bonds payable from said account, and any excess moneys available shall be used to pay matured principal of such bonds in order of their maturity dates, provided that moneys available for payment of bonds maturing on the same date shall be prorated equally among such bonds.

4. Improvement Warrant Account. There shall also be maintained in said fund an Improvement Warrant Account, for the purpose of segregating net revenues required for the payment of any portion of the cost of improvements hereafter instituted, for which such revenues have been pledged in accordance with the provisions of Chapter 40-22 of the North Dakota Century Code. There shall be transferred from said account as required, to the fund of each improvement district for which such pledge has been made, sums sufficient, together with tax and assessment collections held in such funds, to pay when due the principal and interest on all improvement warrants drawn upon such funds for the financing of such improvements. Moneys sufficient for the requirements of said improvement district funds shall be credited and paid into the Improvement Warrant Account out of the net revenues remaining from time to time after provision for the current requirements of the Revenue Bond Account, and the lien and charge on said net revenues in favor improvement warrants for the payment of which such pledges have been made shall be subordinate only to the lien and charge on said net revenues in favor of revenue bonds payable from the Revenue Bond Account. In the event that moneys in the Improvement Warrant Account shall be insufficient for the making of all transfers required to be made to the several improvement district funds to which such pledges have been made, and cannot be made sufficient by the transfer of funds from the remaining accounts described below, the available moneys shall be apportioned first to the several improvement district funds in sums sufficient to pay interest then accrued on all warrants drawn on such district funds, and any remainder shall be applied in payment of matured principal of such warrants in order of the maturity dates thereof. As among warrants maturing on the same date, such available moneys shall be applied to the warrants of the several issues in proportion to the matured principal amount thereof for the payment of which taxes and assessments in the respective improvement funds are insufficient.

5. Replacement and Depreciation Account. There shall be maintained a Replacement and Depreciation Account, into which there shall be credited and paid as received, except as otherwise stated below, all net revenues in excess of the current requirements of the other accounts above described. In said account there shall be maintained such balances as the governing body shall from time to time determine to constitute an adequate reserve for depreciation and replacement of the utility, which reserve may be used to redeem prior to maturity obligations payable from the net revenues as and when the same become pre-payable according to their terms, or to replace worn out or obsolete properties of the utility, or to make extensions, enlargements or improvements thereto. Any moneys in said account determined to be surplus to the immediate requirements therefore may be invested or may be transferred to other City funds in the discretion of the Board, in the manner and subject to the limitations set forth in Section 40-33-12 of the North Dakota Century Code; and any acts amendatory thereof or supplemental thereto.

6. Moneys on Hand. The moneys on hand in any of the accounts of the Water and Sewer Utility Fund shall at all times be available and shall be used to the extent necessary to restore any deficiency in the funds on hand in any of the preceding accounts, in the order listed above, for the fulfillment of the requirements of such preceding accounts as herein defined.

7. Additional Accounts. The City also reserves the right to create additional accounts within the Water and Sewer Utility Fund for the purpose of segregating any surplus net revenues which may be pledged and appropriated to the payment of obligations hereafter issued to finance improvements, enlargements or extensions of said utility, other than the obligations made payable from the Revenue Bond Account and the Improvement Warrant Account, pursuant to the authority for such issuance reserved in Section 7.0107 hereof. Moneys on hand in any such account shall at all times be available for and used to the extent necessary to meet the current requirements of all of the foregoing accounts except the Replacement and Depreciation Account.

7.0107 Provisions for Financing Capital Improvements

In borrowing money for capital improvements, extensions or additions to said utility the following provisions shall at all times be observed:

1. For the purpose of this section, whenever the net revenues of the utility hereinabove appropriated to the Improvement Warrant Account are pledged to pay a portion of the cost of any improvement to be financed by improvement warrants, such warrants and the interest accruing thereon shall be deemed to be payable from said net revenues in the same proportion as that part of the cost payable from said net revenues bears to the principal amount of such warrants. The portion of costs payable from net revenues shall be deemed equal to the principal amount of the warrants less the principal amount of the taxes and assessments agreed to be levied for the payment thereof.

2. Except as provided in parts (3) and (4) below, no obligations shall be issued and made payable from the Revenue Bond Account or the Improvement Warrant Account at any time unless the net revenues of the utility, as defined in Section 7.0106 (3) hereof, received during the then next preceding fiscal year, shall have been in an aggregate amount at least equal to 125% of the average annual principal and interest payments due on all bonds payable from the Revenue Bond Account which are then outstanding or then to be issued, plus such percentage of the average of the annual principal and interest payments due on each issue of improvement warrants then outstanding or then to be issued as shall be payable from said net revenues, which averages shall be computed on the basis of the principal and interest payments due in the fiscal years of the then remaining term of all such revenue bonds and improvement warrants then outstanding. For the purpose of such computation, whenever rates for water and sewerage service have been changed in the course of any fiscal year, the net revenues for such year shall be deemed to be those which would have been received if such amended rates had been in effect during the entirety of such year, based upon the actual quantities of service furnished to each class of customers and the actual expenses of the utility during such year; provided that in no case shall the net revenues so computed be deemed to exceed 125% of the net revenues actually received during such year.

3. Refunding revenue bonds may be issued for the purpose of prepaying and refunding bonds payable from the Revenue Bond Account when and as they become pre-payable according to their terms, in the manner and to the extent permitted by law, provided that such refunding revenue bonds shall be subject to the requirements set forth in part (2) hereof, as applied to the past net revenues and future principal and interest requirements as of the date of the issuance of such refunding revenue bonds. However, the City shall and does hereby also reserve the right and privilege of issuing refunding revenue bonds, when permitted by law, for the maturities of any bonds payable from the Revenue Bond Account which have matured and for the payment of which the moneys in the Revenue Bond Account are insufficient, and cannot be made sufficient by transfer of moneys from other accounts, and such refunding revenue bonds shall be payable from the Revenue Bond Account on a parity as to interest with all then outstanding bonds payable therefrom, but the maturities of such refunding revenue bonds shall be subsequent to the maturities of all such outstanding bonds. Nothing herein shall be deemed to require the holder of any revenue bond to accept a refunding revenue bond in exchange therefore.

4. The City also reserves the right and privilege of issuing refunding improvement warrants in the manner and to the extent provided in Chapter 40-27 of the North Dakota Century Code and acts amendatory thereof and supplemental thereto. The lien and charge of such refunding warrants on the net revenues appropriated to the Improvement Warrant Account shall be the same as that in favor of the improvement warrants refunded thereby; provided that for the purpose of the computations directed to be made in this section, the maturities and the rate or rates of interest payable on such refunding warrants shall be substituted for the maturities and interest rates of the improvement warrants refunded thereby.

5. Nothing herein shall be deemed to affect the obligation of the City, under the laws of the State of North Dakota, to levy ad valorem taxes upon all taxable property within its corporate limits for the purpose of paying a deficiency, if any, in the fund of any improvement district, at the time of the maturity of the last warrant drawn thereon, or at such earlier time as may be hereafter directed by such laws; provided that it shall be the policy of the City that the amounts of any deficiency tax levies so made shall be restored to the general funds of the City out of any surplus net revenues thereafter received, over and above the requirements of the several accounts of the Water and Sewer Utility Fund as stated in Section 7.0106 hereof.

6. Except as hereinbefore authorized, no obligation of any kind shall be issued and made payable from said net revenues unless the lien thereof is expressly made subordinate and junior to the lien and charge on said net revenues in favor of all revenue bonds and improvement warrants payable from the Revenue Bond Account and the Improvement Warrant Account.

7.0108 Agreements with Bond and Warrant Purchasers

The City shall and does hereby covenant and agree with the original purchaser and each holder from time to time of each bond or warrant issued and made payable from the Revenue Bond Account or the Improvement Warrant Account, as follows:

1. It will complete all improvements financed by the issuance of such obligations with due diligence and with the greatest economy consistent with good workmanship and efficient results, and will do so without creating or permitting the creation of any liens or encumbrances on said utility or on the revenues thereof other than the liens and charges of said revenues expressly authorized in this article.

2. As long as any obligations payable from said accounts are outstanding, it will continue to own and operate said utility as a municipal utility, free from all competitions as to the services thereby provided and in good and efficient operating condition.

3. It will at all times maintain a schedule of rates, charges and rentals for all services, facilities, commodities and benefits furnished by said utility and will impose and collect the same in amounts at least sufficient to make the minimum payments into the respective accounts of the Water and Sewer Utility Fund as specified in Section 7.0106 hereof, and will revise such schedules in such manner and as often as needed to perform this covenant.

4. Under each such schedule, the City shall be obligated to pay and will pay from its other funds to the Water and Sewer Utility Fund a fair and equitable amount for any and all services, facilities, commodities and benefits furnished to the City or any of its departments by the utility.

5. It will at all times maintain books of account adequate to show all receipts and disbursements of the City respecting the utility, and application of such receipts to the purposes of the several accounts described in Section 7.0106 hereof, which books of account shall be open to inspection by the holder of any obligation payable from the Revenue Bond Account or the Improvement Warrant Account at any reasonable time. The

City will furnish a certified transcript therefrom of any information which any such bond or warrant holder may request, upon payment of a reasonable fee therefore.

6. It will cause the annual financial statement of the City required by the provisions of Section 40-16-05 of the North Dakota Century Code to include a statement as to the financial condition and the receipts and disbursements of the Water and Sewer Utility Fund and of its several accounts during each fiscal year, and will furnish a copy of such statement to the original purchaser of each issue of bonds or warrants upon request.

7. Upon written demand of the holder of twenty percent (20%) or more of the bonds or warrants of any issue payable from the Revenue Bond Account or Improvement Warrant Account and then outstanding, it will cause an audit of the books of account of the utility to be made by a certified public accountant satisfactory to the holders of such obligations, the cost thereof to be paid as an operating expense of the utility and will furnish a copy of the report of any such audit to such party as shall be designated in such demand.

8. It will at all times keep the properties of said utility insured in reasonable amounts against loss or damage by fire, tornado and other risks for which similar properties are customarily insured by prudent owners, and will carry adequate public liability insurance, insuring against any claim of personal injury or property damage which is or may become a charge against the revenues of the utility. The City will also cause all persons handling funds of the utility to be bonded in suitable amounts for the protection of the City and the holders of obligations of the utility, and the expense of all such insurance and bonds shall be accounted for as an operating cost of the utility. The City will use the proceeds of any such insurance and bonds to restore the loss or damage compensated thereby.

9. The City and its governing body and each and all of its officers will punctually perform all duties with reference to said utility and the revenues thereof and the obligations issued hereunder which are imposed by the ordinances and resolutions of the City in force on the date upon which any such obligations are issued. All provisions of the Constitution and laws and of such ordinances and resolutions which are provide security for the holders of bonds issued hereunder are acknowledged to be a part of the City's contract with the holders of such obligations; provided that nothing herein shall be deemed to preclude the City from modifying the policies set forth in Section 7.0105 hereof with reference to any improvements constructed and financed after the effective date of such modification.

10. The holders of twenty percent (20%) or more in principal amount of each issue of bonds or warrants payable from the Revenue Bond Account or the Improvement Warrant Account and at the time outstanding shall be privileged, and are hereby empowered, to institute and maintain, on behalf of the holders of all outstanding obligations of the same issue, any suit or proceeding at law or in equity for the protection and enforcement of any covenant, agreement or stipulation herein provided to be performed or observed by the City or its governing body or any of its officers, whether or not any such obligations are then in default as to principal and interest. Each and all of the rights and remedies provided by Sections 40-35-15 and 40-35-19 of the North Dakota Century Code are hereby acknowledged to be available to the holders of such obligations.

7.0109 Approval of Water Purchase Agreement

The City owns a system for the distribution of water for fire protection and other public purposes and for selling water to its inhabitants and industries; that for such purposes the water supply is unsuitable and inadequate; therefore, the City Council deems it necessary and prudent to contract for the purchase of water.

1. Central Plains Water District is a water district able and willing to furnish water to the City for its water system in accordance with the Water Purchase Agreement, entered into by and between the City and Central Plains Water District, which is on file in the office of the City Auditor in accordance with Section 40-33-16 of the North Dakota Century Code. Central Plains Water District will furnish potable water meeting applicable residential purity

standards of the Department of Health of the State of North Dakota in quantities as required by the City at a monthly price to be periodically amended in accordance with the Water Purchase Agreement.

2. The City and Central Plains Water District may contract for the purchase of water for a term of up to forty (40) years from the date of initial delivery of water.

3. The City hereby covenants and agrees that upon the completion and acceptance of the improvements and equipment necessary to take delivery of water under the Water Purchase Agreement, it will initially and thereafter periodically amend its Utility Services Fee Schedule to establish and maintain rates and charges for supplying water to its inhabitants and industries sufficient to produce net stated amounts monthly for specified periods of time during the life of said Water Purchase Agreement over and above the amount sufficient to pay all costs and expenses of operating and maintaining said water system, including operating reserves and the revenues to be paid into the City's water fund. The net stated amounts so collected will be pledged and appropriated to the City's water fund to be used for the monthly payments to become due under the Water Purchase Agreement.

4. The City covenants and agrees to pay at the rate or rates agreed upon in or pursuant to said Water Purchase Agreement for all water taken by the City under said contract.

5. Pursuant to its Home Rule Charter powers and its powers enumerated under Section 40-05.1-06 of the North Dakota Century Code, the City Council deems it necessary and prudent to approve the Water Purchase Agreement without submitting this Ordinance, which authorizes the purchase of water under said contract, to the voters of the City for approval and specifically rejects the voter approval requirement under section 40-33-02 of the North Dakota Century Code. The means of financing are provided herein. The Mayor and the City Auditor are hereby directed to execute on behalf of the City, the Water Purchase Agreement with Central Plains Water District in accordance with the terms and conditions of this Ordinance.

6. That the City, upon approval of this Ordinance by a majority vote of the City Council, will do and perform any other acts or things, which in the discretion of the City Council, are deemed reasonable and appropriate for the procurement of such water under said Water Purchase Agreement on the most efficient and economical basis.

2018 Uniform Plumbing Code

The public water system shall have the authority to survey all service connections within the distribution system to determine if the connection is a cross-connection.

The public water system shall have the authority to control all service connections within the distribution system if the connection is a cross-connection.

The public water system may control any service connections within the distribution system in lieu of a survey if the service connection is controlled with an air gap or reduced pressure zone backflow prevention assembly.

The public water system may collect fees for the administration of this program.

The public water system shall maintain records of cross-connection surveys and the installation, testing and repair of all backflow prevention assemblies installed for containment and containment by isolation purposes.

Except as otherwise provided herein, the public water system shall administer, implement and enforce the provisions of this Ordinance.

3. Applicability

This Ordinance applies to all commercial, industrial and multi-family residential service connections within the public water system and to any persons outside the City who are, by contract or agreement with the public water system, users of the public water system. This Ordinance does not apply to single-family-residential service connections unless the public water system becomes aware of a cross connection at the single-family connection.

 - o. “WATER SUPPLY SYSTEM” means a water distribution system, piping, connection fittings, valves and appurtenances within a building, structure, or premises. Water supply systems are also referred to commonly as premise plumbing systems.

5. Requirements

- a. Commercial, industrial and multi-family service connections shall be subject to a survey for cross connections. If a cross connection has been identified an appropriate backflow prevention assembly and or method shall be installed at the customer’s water service connection within 120 days of its discovery. The assembly shall be installed downstream of the water meter or as close to that location as deemed practical by the public water system. If the assembly or method cannot be installed within 120 days the public water system must take action to control or remove the cross connection, suspended service to the cross connection or receive an alternative compliance schedule from the North Dakota Department of Environmental Quality.

- h. All backflow prevention assemblies shall be tested at the time of installation and on an annual schedule thereafter. Such tests must be conducted by a Certified Cross-Connection Control tester or repairer.
- i. The public water system shall require inspection, testing, maintenance and as needed repairs and replacement of all backflow prevention assemblies and methods, and of all required installations within the owner's plumbing system in the cases where containment assemblies and or methods cannot be installed.

- k. No grandfather clauses exist except for fire sprinkler systems where the installation of a backflow prevention assembly or method will compromise the integrity of the fire sprinkler system.
- l. For new buildings, all building plans must be submitted to the public water system and approved prior to the issuance of water service. Building plans must show:
 - 1. Water service type, size and location
 - 2. Meter size and location
 - 3. Backflow prevention assembly size, type and location

In cases where the installation of a backflow prevention assembly or method will compromise the integrity of the fire sprinkler system the public water system can chose to not require the backflow protection. The public water system will measure chlorine residual at location representative of the service connection once a month and perform periodic bacteriological testing at the site. If the public water system suspects water quality issues the public water system will evaluate the practicability of requiring that the fire sprinkler system be flushed periodically.

6. Inspection, Testing and Repair

- a. Backflow prevention assemblies or methods shall be tested by a Certified Cross-Connection Control Technician upon installation and tested at least annually, thereafter. The tests shall be made at the expense of the customer.

9. Compliance

- a. Customers shall cooperate with the installation, inspection, testing, maintenance, and as needed repair and replacement of backflow prevention assemblies and with the survey process. For any identified uncontrolled cross-connections, the public water system shall complete one of the following actions within 120 days of its discovery:

The public water system shall give notice in writing to any owner whose plumbing system has been found to present a risk to the public water system's distribution system through an uncontrolled cross connection. The notice and order shall state that the owner must install a backflow prevention assembly or method at each service connection to the owner's premises to contain the water service. The notice and order will give a date by which the owner must comply.
 1. In instances where a backflow prevention assembly or method cannot be installed, the owner must install approved backflow prevention assemblies or methods at all cross-connections within the owner's water supply system. The notice and order will give a date by which the owner must comply.

ARTICLE 3 - Regulation of Sewer Use

7.0301 Purpose

It is the purpose of this article to provide ordinances regulating the use of public and private sewers and drains, private sewage disposal, the installation and connection of building sewers and the discharge of waters and wastes into the public sewer system and to provide penalties for violations thereof.

7.0302 Definitions

Unless the context specifically indicates otherwise, the meaning of the terms used in the article are as follows:

1. "BOD" (denoting Biochemical Oxygen Demand) means the quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory procedure in five (5) days at 20 degrees Centigrade, expressed in milligrams per liter.
2. "Building Drain" means that part of the lowest horizontal piping of a drainage system which receives the discharge from soil, waste and other drainage pipes inside the walls of the building and conveys it to the building sewer, beginning five (5) feet (1.5 meters) outside the inner face of the building wall.
3. "Building Sewer" means the extension from the building drain to the public sewer or other place of disposal, also called house connection.
4. "Combined Sewer" means a sewer intended to receive both wastewater and storm or surface water.
5. "Easement" means an acquired legal right for the specific use of land owned by others.
6. "Floatable Oil" is oil, fat or grease in a physical state such that it will separate by gravity from wastewater by treatment in an approved pretreatment facility. A wastewater shall be considered free of floatable fat if it is properly pretreated and the wastewater does not interfere with the collection system.
7. "Garbage" means the animal and vegetable waste resulting from the handling, preparation, cooking and serving of foods.
8. "Industrial Wastes" means the wastewater from industrial processes, trade or business as distinct from domestic or sanitary wastes.
9. "Natural Outlet" means any outlet, including storm sewers and combined sewer overflows, into a watercourse pond, ditch, lake or other body of surface or groundwater.
10. "May" is permissive (see "shall," Sec. 18).
11. "Person" means any individual, firm, company, association, society, corporation or group.
12. "pH" means the logarithm of the reciprocal of the hydrogen-ion concentration. The concentration is the weight of hydrogen ions, in grams, per liter of solution. Neutral water, for example, has pH value of 7 and a hydrogen-ion concentration of 10^{-7} .
13. "Properly Shredded Garbage" means the wastes from the preparation, cooking and dispensing of food that have been shredded to such a degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than $\frac{1}{2}$ inch (1.27 centimeters) in any dimension.
14. "Public Sewer" means a common sewer controlled by a governmental agency or public utility.
15. "Sanitary Sewer" means a sewer that carries liquid and water-carried wastes from residences, commercial buildings, industrial plants and institutions together with minor quantities of ground, storm and surface waters that are not admitted intentionally.
16. "Sewage" is the spent water of a community. The preferred term is "wastewater," Sec. 24.

17. "Sewer" means a pipe or conduit that carries wastewater or drainage water.
18. "Shall" is mandatory (see "may," Sec. 10).

"Slug" means any discharge of water or wastewater which in concentration of any given constituent or in quantity of flow exceeds for any period of duration longer than fifteen (15) minutes more than five (5) times the average twenty-four (24) hour concentration or flows during normal operation and shall adversely affect the collection system and/or performance of the wastewater treatment works.
20. "Storm Drain" (sometimes termed "storm sewer") means a drain or sewer for conveying water, groundwater, subsurface water or unpolluted water from any source.
21. "Superintendent" means the superintendent of wastewater facilities, and/or of wastewater treatment works, and/or of water pollution control of the City or an authorized deputy, agent or representative.
22. "Suspended Solids" means total suspended matter that either floats on the surface of, or is in suspension in water, wastewater or other liquids, and that is removable by laboratory filtering as prescribed in "Standard Methods for the Examination of Water and Wastewater" and referred to as non-filterable residue.
23. "Unpolluted Water" is water of quality equal to or better than the effluent criteria in effect or water that would not cause violation of receiving water quality standards and would not be benefited by discharge to the sanitary sewers and wastewater treatment facilities provided.
24. "Wastewater" means the spent water of a community. From the standpoint of source, it may be a combination of the liquid and water-carried wastes from residences, commercial buildings, industrial plants and institutions, together with any groundwater, surface water and storm water that may be present.
25. "Wastewater Facilities" means the structures, equipment and processes required to collect, carry away and treat domestic and industrial wastes and dispose of the effluent.
26. "Wastewater Treatment Works" means an arrangement of devices and structures for treating wastewater, industrial wastes and sludge. It is sometimes used as synonymous with "waste treatment plant" or "wastewater treatment plant" or "water pollution control plant."
27. "Watercourse" means a natural or artificial channel for the passage of water either continuously or intermittently.
28. "Hearing Board" means that board appointed according to the provisions of Section 7.0209.

7.0303 Use of Public Sewers Required

1. It shall be unlawful for any person to place, deposit or permit to be deposited in any unsanitary manner on public or private property within the City or in any area under the jurisdiction of the City any human or animal excrement, garbage or other objectionable waste.

2. It shall be unlawful to discharge to any natural outlet within the City or in any area under the jurisdiction of the City any sewage or other polluted waters, except where suitable treatment has been provided in accordance with subsequent provisions of this ordinance.

3. Except as hereinafter provided, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool or other facility intended or used for the disposal of sewage.

4. The owner of all houses, buildings or properties used for human occupancy, employment, recreation or other purposes, situated within the City, and abutting on any street, alley or right-of-way in which there is now located or may in the future be located a public sanitary sewer, is hereby required at the owner's expense to install suitable toilet facilities therein, and to connect such facilities directly with the proper public sewer in accordance with the provisions of this ordinance, within 180 days after date of official notice to do so, provided that said public sewer is within 200 feet (61 meters) of the property line according to the North Dakota plumbing code.

7.0304 When Private Sewage Disposal Permitted

1. Where a public sanitary or combined sewer is not available under the provisions of Section 7.0303 (4), the building sewer shall be connected to a private wastewater disposal system complying with the provisions of this article.

3. Before commencement of construction of a private wastewater disposal system, the owner

shall first obtain a written permit from the city. The application for such permit shall be made on a form furnished by the City, which the applicant shall supplement by any plans, specifications and other information as are deemed necessary.

3. A permit for a private wastewater disposal system shall not become effective until the installation is completed to the satisfaction of the North Dakota State Department of Health.

4. The type, capacities, location and layout of a private wastewater disposal system shall comply with all recommendations and/or regulations of the North Dakota State Department of Health. No permit shall be issued for any private wastewater disposal system not meeting these conditions. No septic tank or cesspool shall be permitted to discharge to any natural outlet or to the ground surface.

5. At such time as a public sewer becomes available to a property served by a private wastewater disposal system, as provided in Section 7.0303 (4), a direct connection shall be made to the public sewer within 180 days in compliance with this ordinance, and any septic tanks, cesspools and similar private wastewater disposal facilities shall be cleaned of sludge and filled with suitable material.

6. The owner shall operate and maintain the private wastewater disposal facilities in a sanitary manner at all times, at no expense to the City. All sludge or solids, to be disposed of from a septic tank, cesspool or other individual method of disposal shall be disposed of by a licensed septic tank pumper in accordance with Section 23-19-01 of the North Dakota Century Code.

7. No statement contained in this article shall be construed to interfere with any additional requirements that may be imposed by the local City Governing Body.

7.0305 Building Sewers and Connections

1. No unauthorized person shall uncover, make any connection with or opening into, use, alter or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the superintendent.
2. There shall be two (2) classes of building sewer permits: (a) for residential and commercial service, and (b) for service to establishments producing industrial wastes. In either case, the owner or his agent, shall make application on a special form furnished by the City. The permit application shall be supplemented by any plans, specifications or other information considered pertinent in the judgment of the superintendent.
3. All costs and expense incidental to the installation and connection of the building sewer shall be borne by the owner. The owner shall indemnify the City from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.
4. A separate and independent building sewer shall be provided for every building; except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, court, yard or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer. The City does not and will not assume any obligation or responsibility for damage caused by or resulting from any such single connection.
5. Old building sewers may be used in connection with new buildings only when they are found, on examination and test by the superintendent, to meet all requirements of this ordinance.
6. The size, slope alignment, materials of construction of all sanitary sewers including building sewers, and the methods to be used in excavating, placing of the pipe, jointing, testing and backfilling the trench, shall all conform to the requirements of the building and plumbing code or other applicable rules and regulations of the City. In the absence of suitable code provisions, specifications of the state building and plumbing codes shall apply.
7. Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.
8. No person shall make connection of roof downspouts, foundation drains, areaway drains or other sources of surface runoff or groundwater to a building sewer, or building drain which in turn is connected directly or indirectly to a public sanitary sewer unless such connection is approved by the superintendent and the North Dakota State Department of Health.
9. The connection of the building sewer into the public sewer shall conform to the requirements of the building and plumbing code or other applicable rules and regulations of the City. All such connections shall be made gastight and watertight and verified by proper testing. Any deviation from the prescribed procedures and materials must be approved by the superintendent before installation.
10. The applicant for the building sewer permit shall notify the superintendent when the building sewer is ready for inspection and connection to the public sewer. The connection and testing shall be made under the supervision of the superintendent or his representative.
11. All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways

and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the City.

7.0306 Use of Public Sewers

1. No person shall discharge or cause to be discharged any unpolluted waters such as storm water, surface water, groundwater, roof runoff, subsurface drainage or cooling water to any building drain or sewer which in turn is connected directly or indirectly to the sanitary sewer unless such connection is approved by the superintendent and the North Dakota State Department of Health.

2. Storm water other than that exempted under Section 7.0306 (1) and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as combined sewers or storm sewers, or to a natural outlet approved by the superintendent and the North Dakota State Department of Health.

3. No person shall discharge or cause to be discharged any of the following described water or wastes to any public sewers:

a. Any gasoline, benzene, naphtha, fuel oil or other flammable or explosive liquid, solid or gas.

b. Any waters containing toxic or poisonous solids, liquids or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the wastewater treatment plant.

c. Any waters or wastes having a pH lower than 5.5, or having any other corrosive property capable of causing damage or hazard to structures, equipment and personnel of the wastewater works.

d. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers or other interference with the proper operation of the wastewater facilities such as, but not limited to ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, unground garbage, whole blood, paunch manure, hair and flushing's, entrails and paper dishes, cups, milk containers, etc. either whole or ground by garbage grinders.

4. The following described substances, materials, waters or waste shall be limited in discharges to city systems to concentrations or quantities which will not harm either the sewers, wastewater treatment process or equipment, will not have an adverse effect on the receiving stream, or will not otherwise endanger lives, limb, public property or constitute a nuisance. The superintendent may set limitations lower than the limitations established in the regulations below if in his opinion such more severe limitations are necessary to meet the above objectives. In forming his opinion as to the acceptability, the superintendent will give consideration to such factors as the quantity of subject waste in relation to flows and velocities in the sewers, materials of construction of the sewers, the wastewater treatment process employed, capacity of the wastewater treatment plant, degree of treatability of the waste in the wastewater treatment plant and other pertinent factors. The limitations or restrictions on materials or characteristics of waste or wastewaters discharged to the sanitary sewer which shall not be violated without approval of the superintendent are as follows:

a. Wastewater having a temperature higher than 150 degrees Fahrenheit (65 degrees Celsius).

- b. Wastewater containing more than 25 milligrams per liter of petroleum oil, non-biodegradable cutting oils or product of mineral oil origin.
- c. Wastewater from industrial plants containing floatable oils, fat or grease.
- d. Any garbage that has not been properly shredded (see Section 7.0302 (13). Garbage grinders may be connected to sanitary sewers from homes, hotels, institutions, restaurants, hospitals, catering establishments or similar places where garbage originates from the preparation of food in kitchens for the purpose of consumption on the premises or when served by caterers.
- e. Any waters or wastes containing iron, chromium, copper, zinc and similar objectionable or toxic substances to such degree that any such material received in the composite wastewater at the wastewater treatment works exceeds the limits established by the superintendent for such materials.
- f. Any waters or wastes containing odor-producing substances exceeding limits which may be established by the superintendent.
- g. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the superintendent in compliance with applicable state or federal regulations.
- h. Quantities of flow, concentrations or both which constitute a "slug" as defined herein.
- i. Waters or wastes containing substances which are not amenable to treatment or reduction by the wastewater treatment processes employed, or are amenable to treatment only to such a degree that the wastewater treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.
- j. Any water or wastes which, by interaction with other water or wastes in the public sewer system, release obnoxious gases, form suspended solids which interfere with the collection system or create a condition deleterious to structures and treatment processes.

5. If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated in Section 7.0306(4), and which in the judgment of the superintendent, may have a deleterious effect upon the wastewater facilities, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the superintendent may:

- a. Reject the wastes;
- b. Require pretreatment to an acceptable condition for discharge to the public sewers;
- c. Require control over the quantities and rates of discharge; and/or
- d. Require payment to cover the added costs of handling and treating the wastes not covered by other sewer charges.

If the superintendent permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the superintendent and the North Dakota State Department of Health.

6. Grease, oil and sand interceptors shall be provided when, in the opinion of the superintendent, they are necessary for the proper handling of liquid wastes containing floatable grease in excessive amounts as specified in 7.0306 (4) (c), or any flammable wastes, sand or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the North Dakota Plumbing Code and shall be located as to be readily and easily accessible for cleaning and inspection. In the maintaining of these interceptors the owner shall be responsible for the proper removal and disposal by appropriate means of the captivated material and shall maintain records of the dates, and means of disposal which are subject to review by the superintendent. Any removal and having of the collected materials not performed by owner personnel must be performed by currently licensed waste disposal firms.

7. Where pretreatment or flow-equalizing facilities are provided or required by any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at his expense.

8. When required by the superintendent, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable structure together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling and measurement of the wastes. Such structures, when required, shall be accessibly and safely located and shall be constructed in accordance with plans approved by the superintendent. The structure shall be installed by the owner at his expense and shall be maintained by the owner so as to be safe and accessible at all times.

9. The superintendent may require a use of sewer services to provide information needed to determine compliance with this ordinance. These requirements may include:

- a. Wastewaters discharge peak rate and volume over a specified time period.
- b. Chemical analyses of wastewaters.
- c. Information on raw materials, processes and products affecting wastewater volume and quality.
- d. Quantity and disposition of specific liquid, sludge, oil, solvent or other materials important to sewer use control.
- e. A plot plan of sewers of the user's property showing sewer and pretreatment facility location.
- f. Details of wastewater pretreatment facilities.
- g. Details of systems to prevent and control the losses of materials through spills to the City sewer.

10. All measurements, test and analyses of the characteristics of waters and wastes to which reference is made in this ordinance shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater," published by the American Public Health Association. Sampling methods, location, times, durations and frequencies are to be determined on an individual basis by the superintendent.

11. No statement contained in this section shall be construed as preventing any special agreement or arrangement between the City and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the City for treatment.

7.0307 Damage to Sewer Works Prohibited

No person shall maliciously, willfully or negligently break, damage, destroy, uncover, deface or tamper with any structure, appurtenance or equipment which is a part of the wastewater facilities. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct.

7.0308 Powers and Authority of Inspectors

1. The superintendent and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all properties for the purposes of inspection, observation, measurement, sampling and testing pertinent to discharge to the community system in accordance with the provisions of this ordinance.
2. The superintendent or other duly authorized employees are authorized to obtain information concerning industrial processes that have a direct bearing on the kind and source of discharge to the wastewater collection system. The industry may withhold information considered confidential. The industry must establish that the revelation to the public of the information in question might result in an advantage to competitors.
3. While performing the necessary work on private properties referred to in Section 7.0308 (1), the superintendent or duly authorized employees of the City shall observe all safety rules applicable to the premises established by the company, and the company shall be held harmless for injury or death to the City employees, and the City shall indemnify the company against loss or damage to its property by City employees and against liability claims and demands for personal injury or property damage asserted against the company growing out of the gauging and sampling operation, except such as may be caused by negligence or failure of the company to maintain safe conditions as required in Section 7.0306 (8).
4. The superintendent and other duly authorized employees of the City bearing proper credentials and identification shall be permitted to enter all private properties through which the City holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair and maintenance of any portion of the wastewater facilities lying within said easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

7.0309 Hearing Board

1. A hearing board, consisting of three (3) members, may be selected as needed for arbitration of differences between the superintendent and sewer users on matters concerning interpretation and execution of the provisions of this ordinance by the superintendent.
2. If a hearing board is used, one member of the board shall be selected to represent the City, one member shall be selected to represent the sewer user involved in the arbitration and the third member shall be acceptable to both parties and shall serve as the chairman in the arbitration.

7.0311 Validity

The invalidity of any section, clause, sentence or provision of this ordinance shall not affect the validity of any other part of this ordinance which can be given effect without such invalid part or parts.

ARTICLE 4 - Sewer Surcharge

7.0401 Purpose

1. The purpose of this article shall be to generate sufficient revenue to pay all costs for the operation and maintenance of the complete wastewater system. The costs shall be distributed to all users of the wastewater system in proportion to each user's contribution to the total loading of the treatment works. Factors such as strength (BOD and TSS), volume and delivery flow rate characteristics shall be considered and included as the basis for the user's contribution to ensure a proportional distribution of operation and maintenance costs to each user.

2. The definitions set forth in Section 7.0302 of this chapter shall also apply to this article.

7.0402 Determining the Total Annual Cost of Operation and Maintenance

The City or city engineer shall determine the total annual costs of operation and maintenance of the wastewater system which are necessary to maintain the capacity and performance, during the service life of the treatment works, for which such works are designed and constructed. The total annual cost of operation and maintenance shall include, but need not be limited to, labor, repairs, equipment replacement, maintenance, necessary modifications, power, sampling, laboratory tests and a reasonable contingency fund.

7.0403 Determining a Surcharge System for Users with Above Normal Volume, BOD and TSS

The City or the city engineer may determine the average total suspended solids (TSS) and biochemical oxygen demand (BOD) daily loadings for the average residential user and residential user class. The City will assess a surcharge rate for all non-residential users discharging wastes with volume, BOD and TSS strengths greater than the average residential user. Such users will be assessed a surcharge sufficient to cover the costs of treating such users above-normal strength wastes and/or volume. Normal strength wastes are considered to be 200 mg/1 BOD and 250 mg/1TSS.

7.0404 Surcharge Rate Schedule for Above Normal Volume of Wastes

Residential users are hereby levied a charge as determined by the city council. Non-residential users with flows no greater than the average residential user's flow will be levied the same charge as the average residential user.

7.0405 Payment of the User's Wastewater Service Charge

The City may submit an annual statement to the user for the user's annual wastewater service charge or one-twelfth of the user's annual wastewater service charge may be included with the monthly water and/or wastewater utility billing. Should any user fail to pay the user wastewater service charge within one (1) month of the due date, the City may stop the wastewater service to the property.

7.0406 Review of Wastewater Service Charge

The City shall review the total annual cost of operation and maintenance of the wastewater contribution percentage on an annual basis and will revise the system as necessary to assure equity of the service charge system established herein and to assure that sufficient funds are obtained to adequately operate and maintain the wastewater system. If a significant user, such as an industry, has completed in-plant modifications which would change that user's wastewater contribution percentages, the user can present at a regularly scheduled meeting of the governing body such factual information and the City shall determine if the user's wastewater contribution percentages are to be changed. The City shall notify the user of its findings as soon as possible.

7.0407 Wastes Prohibited from Being Discharged to the Wastewater System

The discharge of any waters containing toxic or poisonous solids, liquids or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any wastewater treatment process or to constitute a hazard in the receiving waters of the wastewater treatment plan is hereby prohibited.

7.0503 Plumbing Code - Changes in Existing Installations

The superintendent of the water and sewer department is hereby given authority to order the repair, alteration or removal of any sanitary sewer connection or plumbing, any connection to storm water sewer, or any private sanitary drain, cesspool or privy, which in the superintendent's judgment is so installed or is in such condition as to be unsanitary, or to constitute a public nuisance or menace to health. In case of such repair, alteration or removal, if the plumbing code is not observed and connections not properly executed by the owner or owners thereof, in accordance with the superintendent's directions, the superintendent may cause the same to be discontinued from any source of water supply. It shall thereafter be unlawful for any person in any manner to use any such installation, or to supply water thereto, until the same shall have been put in a safe and sanitary condition according to the superintendent's direction.
